Business Question and Visualization Report - Tableau

Date	29 October 2026
Team ID	Individual Project - Ujjawal Rathod
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	5 Marks

Purpose

The Tableau workbook translates nine business questions into worksheets and dashboards. Use the canonical field names below as a mapping guide; exact field captions in the published workbook may differ depending on the source CSV headers.

Evidence note: this handoff contains the existing Tableau Public project link but not a fresh workbook export or screenshots. Worksheet specifications below describe the intended visual encoding. Recheck actual labels and figures in Tableau before final submission.

#	Business question	Worksheet	Tableau field mapping	Visual	Decision use / prior summary
1	Which categories lead EV sales volume?	EV Sales by Category	Rows: Vehicle Category; Columns: SUM(Sales Volume); sort descending; labels enabled.	Horizontal bar	Supports Emily's portfolio and marketing allocation decisions.
2	How does sales volume change from 2018 to 2026?	Sales Trend by Model Year	Columns: Model Year; Rows: SUM(Sales Volume); Line marks; show year labels.	Line chart	Highlights rising, falling, or stable demand by year.
3	How fragmented is the manufacturer market?	Top Manufacturers	Rows: Manufacturer; Columns: SUM(Sales Volume); filter Top 10 by sales; stable overall-market denominator for share.	Ranked bars	Earlier project summary described roughly 200 manufacturers and a leader share around 0.6%; verify actual workbook values.
4	What is the mix of battery technologies?	Battery Technology Mix	Color: Battery Type; Angle/Label: SUM(Sales Volume); show percent of total.	Donut / stacked bar	Earlier summary reported NMC 33.7%, LFP 32.0%, NCA 17.3%, Sodium-Ion 9.9%, Solid-State about 7%; verify.
5	How does range vary by vehicle category?	Average Range by Category	Rows: Vehicle Category; Columns: AVG(Driving Range KM); axis 0-based; sort descending.	Bar chart	Earlier summary gave roughly 550 km for Luxury Sedan and 105 km for Two-Wheeler Scooter; recheck.
6	Do battery technologies differ in range and energy consumption?	Range vs Energy Consumption	Columns: AVG(Energy Consumption Wh/Km); Rows: AVG(Driving Range KM); Color: Battery Type.	Scatter plot	Compares efficiency and range together rather than treating range as the only performance measure.

#	Business question	Worksheet	Tableau field mapping	Visual	Decision use / prior summary
7	How consistent is customer satisfaction across categories?	Customer Ratings by Category	Rows: Vehicle Category; Columns: AVG(Customer Rating); fixed axis 0-5; tooltip includes count of ratings.	Dot / bar chart	Earlier summary reported average ratings around 4.08-4.09 out of 5; verify against workbook.
8	Which manufacturing countries and regions are most represented?	Manufacturing Country x Market Region	Rows: Manufacturing Country; Columns: Market Region; Color: SUM(Sales Volume); use tooltip for exact values.	Heatmap	Helps David compare supply/manufacturing footprint and regional demand.
9	How is sales volume distributed across seven market regions?	Sales by Market Region	Rows: Market Region; Columns: SUM(Sales Volume); optionally add percent of total.	Sorted bars / map	Earlier summary described sales as broadly distributed across seven regions; validate the degree of balance.

Calculated fields to document

Field	Tableau formula / method	Purpose
Market Share %	SUM([Sales Volume]) / { FIXED : SUM([Sales Volume]) }	Provides an all-market denominator that avoids the Top 10 bars summing to 100% when the full market is much larger. Check context-filter behavior.
Average Driving Range	AVG([Driving Range KM])	Compares average range by category or battery type.
Average Customer Rating	AVG([Customer Rating])	Use only valid 1-5 scores; show rating count in tooltip.
Battery Mix %	SUM([Sales Volume]) / TOTAL(SUM([Sales Volume]))	Share of sales by battery technology within the intended view; document which filters affect the denominator.
