Tableau Story Design - EV Market Insights

Date	29 October 2026
Team ID	Individual Project - Ujjawal Rathod
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	5 Marks

Story purpose

The Tableau Story converts the nine dashboard worksheets into a narrative for three stakeholder personas. The sequence starts with a market overview, then explains the strategic, competitive, and sustainable-mobility questions in a progressive order.

The story flow illustration is a design plan. Use the existing published Tableau Story link for live evidence and verify all observations against the current workbook before submission.

Story point plan

Story point	Audience / content	Key worksheets	Narrative question	Takeaway to validate
1. Market Overview	All stakeholders; scope, sales category mix, model-year trend and regional view.	EV Sales by Category; Sales Trend by Model Year; Sales by Region	What does the overall EV market look like?	The overview identifies the sales mix, time pattern and regional distribution.
2. Market Strategy - Emily Johnson	Portfolio and budget priorities.	EV Sales by Category; Top Manufacturers; Average Range by Category; Customer Ratings	Which categories and trends merit commercial focus?	Category demand and range/satisfaction should be considered together before changing investment.
3. Competition & Geography - David Chen	Competitor fragmentation, battery adoption, manufacturing countries and regions.	Top Manufacturers; Market Share %; Battery Mix; Country x Region Heatmap	How is competition distributed, and where are manufacturing and market activity concentrated?	Prior summary indicates about 200 manufacturers and a leading share around 0.6%; validate the market-share denominator and geographic totals.

Story point	Audience / content	Key worksheets	Narrative question	Takeaway to validate
4. Technology & Sustainability - Dr. Sarah Williams	Battery types, driving range, energy use and ratings.	Battery Mix; Range by Category; Range vs Energy Consumption; Customer Ratings	Does chemistry affect range and the customer experience?	Prior summary suggests category explains much of the range spread and customer ratings are clustered around 4.08-4.09/5; verify in workbook.

Storytelling and interaction rules

- Each story point should have a short title, one guiding question, and no more than two takeaway sentences.
- Maintain consistent colors for battery types and vehicle categories across every story point.
- Use annotations only when the underlying data supports the claim; label historical/model-year coverage.
- Keep shared filters consistent where possible and explain when a fixed market-share denominator is unaffected by filters.
- End with a decision-oriented summary and avoid claiming causality from simple descriptive comparisons.
