Communication

Date	29 October 2026
Team ID	Individual Project — Ujjawal Rathod
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Self-review with task checklist	Ujjawal Rathod	Plan the day's work and track progress
2	Progress Update	Weekly	SkillWallet project page	Ujjawal Rathod, mentor	Report completed phases and deliverables
3	Issue / Bug Discussion	As Needed	AI assistants (Claude, ChatGPT, Gemini) and screenshots of errors	Ujjawal Rathod	Resolve Tableau, Python and deployment problems
4	Stakeholder Review	Bi-Weekly	SkillWallet submissions and feedback	Ujjawal Rathod, mentor / reviewer	Review dashboard and documents and collect feedback
5	Final Demo Rehearsal	Once	Screen-recorded walkthrough of dashboard and web app	Ujjawal Rathod	Practise the demo flow and timing
6	Code & Version Updates	After each change	GitHub repository	Ujjawal Rathod	Keep source code and files backed up and shareable

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	The AI assistant's usage limit was reached in the middle of the project, so context was split across tools	Exported the earlier conversation as a PDF and shared it with another assistant to continue from the same point
2	Flask app would not run locally: pip was missing because the system Python came from MSYS2	Installed Python from python.org with 'Add to PATH' and used the py launcher to install requirements and run the app
3	Project files were downloaded into the wrong folders, so app.py and requirements.txt were not found	Extracted the project zip and ran the commands from the inner ev_flask_app folder with the correct structure
